HOW EXAMX WORKS

One platform runs the whole exam, from the first question to the final result.

ExamX by Greatify is an AI-native examination platform for universities, exam boards, employers and schools, on campus or online. AI does the repetitive work at every step. A named person makes every decision, and the record shows who and when.

1

BEFORE THE EXAM

Author

AI drafts the paper from your syllabus and maps every question to a learning outcome. Your reviewers approve it in one place.

- Up to 20 question types
- Setting and approval workflows
- Question bank with a knowledge graph

2

DURING THE EXAM

Deliver

The paper stays encrypted and unlocks only when the exam starts, on tablets, laptops or phones, on campus or online.

- Handwriting on a tablet
- Typed and coding answers
- Tablets work offline and sync later

3

DURING THE EXAM

Proctor

AI checks identity and watches every session, and a proctor reviews every flag before anything happens.

- Face match at login
- Secure app and browser lockdown
- Three proctoring modes

4

AFTER THE EXAM

Grade

AI scores typed and handwritten answers against your rubric, with a reason for every point. Faculty confirm or change every grade.

- Answer sheets ready in about 10 minutes
- Second opinions and moderation
- Feedback to students

5

AFTER THE EXAM

Report

Results, analytics and accreditation evidence come from the same records. Nobody retypes grades into a spreadsheet.

- Item analysis
- Learning-outcome attainment
- Exports to your student system, Excel, CSV or PDF

EVERY ANSWER TYPE IN ONE EXAM

RUN IT YOUR WAY

1. **Our managed fleet**
We bring charged, locked tablets and a crew to support them on exam day, then wipe every device.

2. **Your institution's fleet**
We set up, update and lock the tablets you already own, run the exam and wipe them afterward.

3. **Students' own devices**
Students take the exam on their own tablet, laptop or phone, with the secure ExamX app or browser and AI proctoring.

PRICING
Per student per exam or per student per year. Managed tablets need no upfront hardware cost.
